CALFRESH STUDENT EXEMPTION VERIFICATION OF ENROLLMENT

The Master of Arts in Teaching (MAT) program enables students to receive their master's in teaching degree and a single or multiple subject teacher credential in 14 months. The MAT with Single Subject Credential prepares candidates to teach social science, mathematics, English language arts, sciences, art, or world languages at the middle or high school level. The MAT with Multiple Subject Credential prepares students to teach all grade levels and content areas within the elementary school curriculum. Candidates experience a yearlong school site apprenticeship where they can apply the content-specific teaching practices and theories studied in coursework.

The UC Irvine School of Education is esteemed for graduating classroom innovators. The MAT combines best instructional practices with cutting-edge research and rich mentoring opportunities. The MAT program increases student employability after graduation because of the rigorous student-teaching component, as well as the pre-graduation professional development candidates undergo. MAT graduates are known as teacher-leaders, positively influencing the professional growth of colleagues and other learners. MAT alumni are making a difference in schools across California.

I Certify that _____ is enrolled in the Master of Arts in Teaching Program at the University of California, Irvine and meets all requirements to qualify for the Federal regulation 7 CFR Section 273.5(b)(11) to receive CalFresh Student Exemption.

Sincerely,

David Lim
